1929

## A PERSONAL MESSAGE

It is with great pleasure that we present our new catalog. and we believe this to be an opportune time for its introduction.

Our Nurseries have reached the reputation we now enjoy through our customers who have made them what they are, and we believe those whom we have had the pleasure of serving in the thirty-four years of our experience in the nursery business have confidence in our organization.

To those who have never purchased nursery stock from us, may we ask that you convince yourself of the reliability of our statements by giving us a trial order. We wish to be understood that we do not sell the "cheapest" trees and plants, but as good as can be grown in the best of soils, and at low prices when quality and services are considered.

## ROOT'S NURSERIES, Inc.

Phone Landisville 104-R-13

## Landscape Service

In this department you are rendered complete service. Not only can we supply you with the plants, but tell you how they should be used to best advantage.

We shall be glad to offer suggestions for arranging the plantings of the new home as well as making additions to existing plantings. If definite plans are required, our land-scape department is prepared to serve you in this manner. Many of our clients prefer to have our men plant the trees and shrubs on their grounds. The cost of this service is nominal, but it is an assurance that the work will be properly done and that the stock will be given the best possible start.

done and that the stock will be given the best possible start.

When you have us do the planting of ornamentals, any plants that die during the first season will be resupplied at one-half price, or credited on new selection, provided the original account was paid promptly.

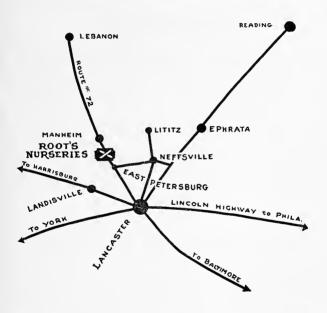

#### WHAT YOU WILL FIND IN THIS CATALOGUE Pages Evergreens 2 to Ornamental Shrubs..... 10 to 15 Shade and Ornamental Trees..... Hedge Plants.... Roses Hardy Perennial Plants..... 22 to 24 25 Climbing Vines..... Fruit Trees..... 26 to 31 Small Fruits..... Instructions to Purchasers.....

Complete Index in back of Catalog.

Ardescriptive booklet on "How To Plant" will be sent with each order.

Above picture shows entrance to our Office and Sales Ground.

TELEPHONE-LANDISVILLE 104-R-13

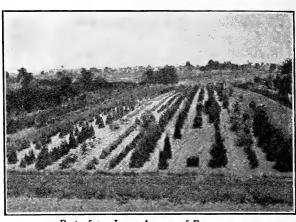

## HOW TO REACH THE NURSERIES

Our Nurseries are conveniently located on Route 72, or the Lancaster-Lebanon Highway. The newly built concrete road, which is the relocation of the Highway, passes through one of the farms on which we grow Nursery Stock.

Whether you are traveling south from Manheim or north from East Petersburg on this road, you cannot miss our signs placed on the side to the east. After you see one of these signs you will be directed at the next intersection over our private road to the office and sales grounds. private road to the office and sales grounds.

If you are not acquainted with the location of our Nurseries, a little study of the above map will help you to get to us with

very little, if any, trouble.

Part of our Large Acreage of Evergreens.

## **EVERGREENS**

These Evergreens have been transplanted frequently. Each time they have been given ample room for proper growth. Every one is sheared into a symmetrical shape. Freshly dug in the nursery for your individual order. Balled and bur-

lapped.

All of the following varieties may be trimmed and used for Foundation planting, etc., with the exception of the Abies or Firs, the Piceas or Spruces, and the Pinus or Pines. (Except Mugho Pine which is dwarf.) These varieties will grow large and should be used for specimens, screens or for massing where there is plenty of room for them to develop.

## HOW TO PLANT THEM SO THEY WILL LIVE

Get your plants at once. Open them immediately.

Reep them where they cannot dry out until planted.
Prepare the soil thoroughly before planting.
Do not allow the roots of the plants to dry out before planting.
Pack the soil firmly around the roots when planting.

Mulch after planting.
Keep the soil moist until after growth starts. Give shade and support if necessary.

## LIGUSTRUM—PRIVET

LIGUSTRUM ovalifolium, 9'-10'. California Privet California Privet. The most popular hedge plant on account of its beauty, adaptability, and low cost. Did you ever realize what an admirable and luxuriant privet hedge you could secure at a very small cost, and how much it would add to the value of your property? To find the exact number wanted, measure the space where it is to be planted and multiply the number of feet by two.

They should be planted 3 inches deeper than they stood in the nursery row. Set the plants 6 inches apart in the row. Dip the roots in water before planting. After plants are set, cut them down to 4 inches from the surface of the ground. This will cause a thick new growth to start and is very essential

for a beautiful hedge.

When cutting, each time allow about 1 to 2 inches above where it was cut before until you get the height desired.

## ROSES

The list we offer is not a large one but contains the "cream" of the ones that do well here. These roses are 2 year No. 1, potted. They will bloom this year.

Scientific Name

Common Name

#### Everblooming Roses

Hybrid Teas and Teas

Gruss an Teplitz. Everblooming scarlet crimson. A strong The best everbloomer of its color. grower.

Each Per 10 8.50 1.00

Jonkheer J. L. Mock. A new pink Rose from Holland; vigorous in growth and hardy, with long smooth canes and great freedom of bloom. Flowers are round and full bright pink faced carmine.

1.00 8.50

**Ophelia.** Salmon-flesh, shaded rose. A Rose that is admired by everyone. 8.50 1.00

Radiance. Lovely light silvery pink flowers, with beautiful suffusion of deeper color. It may be relied upon to produce flowers under all conditions.

1.00 8.50

Red Radiance. A deep red, with great globular flowers. Blooms until frost.

8.50

Souv. de Claudius Pernet. Color a decided and unstained sunflower yellow, even deeper toned at center. Will not fade. Flower form is large and full, the buds long and pointed. Vigorous grower.

1.00 8.50

Frau Karl Druschki. Constant bloomer. Best white. 8.50 1.00

# Climbers and Ramblers

Climbing American Beauty. Plant a vigorous grower. Color red, same as the famous old American Beauty. Wonderfully free bloomer.

7.50 .80

**Dorothy Perkins.** Rambler. In June and July this one produces immense trusses of delightful pink flowers. Hardiest of all roses. .80 7.50

Dr. W. Van Fleet. This is one of the most magnificent and showy roses of any class. Color a delicate shade of flesh pink on the outer surface, deepening to rosy flesh in the center. .80 7.50

Paul's Scarlet Climber. Midseason. The most brilliant, vivid scarlet of any Rose grown. The color is intense and the flowers come in beautiful open cluster-heads with from 5 to 15 blooms, on very long strong stems. 7.50

Golden Rose of China ROSA hugonis, 5'-6' A very desirable border rose with very attractive yellow flowers. Two year extra. 1.00

## HARDY PERENNIAL PLANTS

Scientific Name

Common Name Each Per 10

Larkspur

ANEMONE. Pink or White ASTILBE Japonica Hybrids (Spirea) .30

America. Deep pink; excellent forcing variety. Brunhilde. Creamy white, shaded lilac.

Philadelphia.

Queen Alexandra. Light pink; good for forcing.

2-year.....\$..50 CAMPANULA carpatica.

Carpathian Bellflower A pretty species growing in compact tufts, not exceeding 8 inches high; flowers clear blue, held erect on wiry stems. It begins blooming in June, continuing until October. As an edging for a hardy border or for the rockery it is unsurpassed.

1-year..... 2.00 .25

#### CANNAS

#### How to Make a Round Canna Bed

Plant 1 Canna in the center, 6 in the first circle, 12 in the second circle, then 18, 24, etc., according to the size of the bed, with the circles 18 inches apart, and the plants in the circle 18 inches apart. A bed 4 feet in diameter takes 7 Cannas; a 7-foot bed, 19 Cannas; a 10-foot bed, 37 Cannas; a 16-foot bed, 91 Cannas.

King Humbert. 4 ft. Flower orange-scarlet, streaked crimson. Foliage ebony. Its unusually handsome foliage, which is equaled by no other variety, makes this Canna as popular as is The President for its gorgeous flowers.

Salmon Queen. 5 ft. Very good bloomer, salmon color, taller.

The President. 4 ft. Far and away superior to any other scarlet Canna ever produced. This beauty, with its massive heads of glowing scarlet, is in a class by itself for brilliant effect and is used by practically every park superintendent who needs a vivid red in his plantings.

.15 1.25 CHRYSANTHEMUM Maximum, 2' Shasta Daisy .25 White, July-Sept. 2.00

DELPHINIUM belladonna, 2½' Light blue, June-Oct.

They are our best blue cut flower, are perfectly hardy, and established plants produce a number of spikes, giving three crops during the season.

-bellamosum, 2'. June-Oct. Larkspur A dark blue of the type of Belladonna with the color of the old Formosum variety, but not liable to mildew like the latter and of stronger growth.

.25 2.00 1-year..... DAHLIAS. Fine collection of named varieties.. 2.50

Mixed varieties..... 1.00 DIANTHUS barbatus, 1½' Sweet William

Double flower, May-June. .20 1.50

-Gertrude, 1', red.

.25 2.00

—Her Majesty, 10". Very large purest double white. .50 4.00 Grass Pink -Plumarius, 1' Pink, purplish and white, fragrant flowers and on long spikes. For border or rock garden.

## **APPLES**

There is a constantly increasing demand for high-quality fruit of all kinds, and in no class of fruit is the demand more noticeable than in Apples. With the proper selection of varieties and intelligent cultivation, there is no reason why the orchardist who makes a specialty of Apples should not have a business yielding him larger returns for the money and labor invested than almost any other horticultural industry. Where Apples are grown solely for home use, a wide range of varieties may be selected; and the list of distinct kinds offered in our catalog afford the choicest varieties in all desirable types; and cover the entire range of ripening seasons.

Apple trees should be set 32 to 40 feet apart.

Fillers. Most commercial orchards are now planted with standard varieties, 40 feet apart each way. Quick, upright growing, early maturing varieties are used as fillers, planting between standards to make 20 ft. apart; fillers to be removed when the standard trees require the room (12 to 18 years). This requires 28 standard and 82 fillers to the acre. We recommend for fillers: Yellow Transparent, Oldenburg, Grimes Golden, McIntosh and Wealthy, or peach trees.

SUMMER APPLES

Benoni. Attractive, red, best eating apple of its season.
Early bearer and very productive.

Early bearer and very productive.

Early Harvest. Medium, pale yellow, tender, juicy.

Oldenburg (Duchess of Oldenburg). Good size, yellow, streaked red, juicy, sub-acid, productive.

Summer Rambo. Very large; flesh yellow, firm, tender, very juicy, mild sub-acid.

Red Astrachan. Large, beautiful deep crimson. A favorite eating and cooking apple.

Yellow Transparent. Earliest and best; white, tender, juicy, sprightly, sub-acid. Grows rapidly, bears young, and makes a profitable "filler."

#### AUTUMN APPLES

Gravenstein. Large striped, fine quality, one of the best fall sorts.

Maiden Blush. Large, beautiful, blush cheek.

An old favorite, originated in Lancaster Smokehouse. Co., Pa.

Wealthy. Medium size, smooth, round, deep red; handsome and of fine quality.

#### WINTER APPLES

Baldwin. Red, l. Winter Banana. Red, large, fine quality, tree vigorous. anana. Size large, golden yellow with bright crimson red.

Cortland. This is a promising new variety originated at the Horticultural Experimental Farms, Geneva, N. Y. The fruit is medium to large in size, of a bright red color. Flesh is pure white.

Delicious. Red and yellow; fine grained, and quite juicy; flavor slightly acid, but very good.

Falawater (sometimes called Pound Apple). yellowish green fruit.

Grimes Golden. No orchard complete without it. Yellow. best quality and productive. For either home or market for this season there is nothing better.

Hubbardston. Large, red, striped, tender, juicy.

Medium; red, extra quality. Ionathan.

McIntosh. Large, deep crimson, highest quality, juicy, sub-acid.

Paradise Winter Sweet. Large; creamy, rosy-cheeked.

Rome Beauty. Large, yellow, shaded red; tender, juicy, sub-acid.

Stark. Large, striped light and red, juicy, mild, sub-acid. An early and abundant bearer, good keeper.

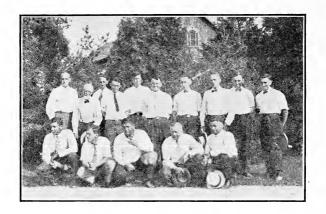

Stayman Winesap. Of the several important descendants of Winesap, this variety is leaping into prominence as a splendid sort for the home or commercial orchard. The tree is a sturdy grower and a very heavy producer. It is adapted to a wide range of soils and climates, thriving almost wherever planted. It runs to large sizes. The fruit is of deep red color, with firm flesh, tender, juicy, and the same rich flavor of the We strongly recommend this variety for the home or parent. commercial orchard.

Medium to large; yellow, shaded red; York Imperial. firm, juicy, sub-acid.

#### CRAB APPLES

Hyslop. Large; deep crimson; one of the most beautiful; very popular.

Transcendent. For many years the most popular crab ople. Fruit about an inch in diameter, yellow, with red apple. cheek.

### Variety Identification Meeting

Photo taken on our show grounds just after going over our Photo taken on our snow grounds just after going over our block of apple trees, in which no trees were discovered that were untrue to name. Prof. F. N. Fagan, State College, could not be with us this day because of illness. He, with Mr. F. M. Trimble, Chief Nursery Inspector, first man to left—front row—is on this committee. We cooperate with Penna. State College and our State Dept. of Agriculture in this work, which is for your additional protection. These men represent nurseries in widely scattered sections of the State.

## PEACHES

We are offering only a limited number of varieties, ones that you can depend on giving you a good crop of fruit. We do not think it worth while to propagate a large number of varieties, when a few of the best will make more money for our customers. The peach crop is quite sure if you give your trees proper attention.

#### Price of Peaches

	Per	Per
Each	10	100
5 to 7 ft\$ .60	\$5.00	\$35.00
$4\frac{1}{2}$ to 6 ft	4.00	25.00
4 to 5 ft	3.00	20.00
3 to 4 ft	2.00	15.00

#### Arranged in Order of Ripening

The very best extra early commercial sort. Greensboro. Hardy and productive, fruit large and tree healthy. white with crimson cheek.

White with red blush. Carman is extra hardy, bears every year, and when it fails all else fails too.

very robust grower and produces heavily.

Hiley (Early Belle). The earliest commercial white freestone peach. It resembles Belle of Georgia, but in quality is superior to most of its white-fleshed competitors. The pretty red cheek and good shipping qualities make it very popular for early market.

Champion. Large variety, creamy white, red cheek, sweet,

rich and juicy. Hardy and productive.

Belle (Belle of Georgia). Very large; skin white with red cheek; flesh white, firm and of excellent flavor. Tree a rapid grower, very prolific.

Capt. Ede. A handsome yellow peach of excellent quality;

hardy in bud and blossom.

J. H. Hale. Probably no new peach has ever been introduced claiming to be so much superior in all ways. It averages one-third to one-half larger than Elberta, ripens about five days earlier and is much superior in flavor. beautiful golden-yellow, with deep carmine blush.

beautiful golden-yellow, with deep carmine blush.

Elberta. Large, yellow, with red cheek; flesh yellow, firm, juicy, of high quality. Exceedingly prolific, sure bearer and hardy. The leading market variety.

Late Crawford. A superb, large, yellow peach.

Mathews (Dr. Funk's strain). Very similar to Elberta but

of better quality.
Old Mixon Free. Large, pale yellow, deep red cheek,

white flesh, tender, rich, good.

Roberta (Late Elberta). Ripens 10 days to 2 weeks later than Elberta which it resembles very closely.

Stump. Large, white, bright red cheek.
Salway. A late yellow variety. Latter part of September. Iron Mountain. Ripens September 15 to October 1. Fruit is of large size; color, white.

Early Golden. Small, pale orange, juicy and sweet.

Dallas. Fruit large, round, early, deep yellow with a fine blush; flesh yellow, firm, juicy and excellent. Tree hardy, a good grower.

Royal. Large, yellow, juicy, rich and delicious; a very

fine variety.

## CHERRIES

	Eacn	Per 10
5 to 7 ft	\$ .85	\$7.50
4 to 6 ft	75	6.50
3 to 4 ft	65	5.50

## SWEET CHERRIES

Very large, dark brown—almost black; flesh firm, sweet, rich and delicious. One of the most profitable sorts. July.

Black Tartarian. Very large, black, juicy. Last of June. Gov. Wood. Large, light red, juicy, rich, delicious. Tree

healthy and productive. June.

Napoleon. Large, pale yellow or red; firm, juicy, sweet and productive. July. Immense size, deep black; flesh dark, tender,

Schmidt. Immense size, deep black; flesh dark, tender, very juicy, fine flavor; productive. July.

Windsor. Fruit large, liver-colored, distinct; flesh remarkably firm and of fine quality. Tree hardy and prolific. A valuable late variety. July.

Yellow Spanish. Large, yellow and red. June.

#### SOUR CHERRIES

Medium, dark red, melting, juicy, Early Richmond. sprightly, rich acid.

English Morello. Fair size, blackish red, rich acid.
Montmorency. Large, deep cherry red, very tender and juicy. It is the best variety for home and market. It ripens at the close of the Early Richmond season, and is of better size than that variety; more meaty and of richer flavor.

## PEARS

Each	Per 10
5 to 7 ft\$ .85	\$7.50
4 to 6 ft	
Dwarf Pear 4 to 5 ft	6.50

Bartlett. Season last of August to September 15th. Good strong grower, flesh is white, fine grained, luscious, large and buttery, has a rich melting flavor and very sweet.

Clapp's Favorite. Summer. Fruit large, yellow lemon color, spotted with brown dots; flesh fine, rich and sweet.

A very good one.

Duchesse. Very large, buttery, rich, juicy, excellent. It succeeds to perfection and is the most popular market variety as a dwarf. Oct. and Nov.

Kieffer. Its large size, handsome appearance, and remark-

able keeping and shipping qualities make it very profitable for market. Oct. and Nov.

Seckel. Small; skin rich yellowish brown when fully ripe, with deep brownish red cheek; flesh very fine-grained, sweet,

exceedingly juicy, melting, buttery; one of the richest and highest flavored pears known. Sept. and Oct. Sheldon. A large, round, russet and red pear of very fine quality; melting, rich, delicious. Tree vigorous, erect, handsome; bears well and should be more largely planted. October.

## PLUMS

Each	Per 10
5 to 7 ft	\$7.50
4 to 6 ft	6.50
3 to 4 ft	

Abundance. One of the oldest and best varieties; hardy, productive. Fruit large, lemon yellow, with heavy bloom; good quality. Aug.

Burbank. Most profitable among growers for market.

Ripens 10 days after Abundance. Tree hardy.

October Purple. A strong, vigorous grower, hardy, productive, of good quality; a large, round, late purple plum, especially recommended for late market.

Red June. One of the vigorous, upright growers; productive; fair size, vermilion red; pleasant quality. Ripens

a week before Abundance. Aug.

Climax. One of the best of the large, early sweet plums, ripening ahead of other varieties, which makes it a very valuable market sort. July.

Gold. Large, oval, bright yellow; rich, juicy, fine quality.

A good grower.

Bradshaw. A very large and fine early plum, dark violet red, juicy and good. Very productive; valuable for market. The tree is very hardy and vigorous. Middle of August.

German Prune. Large, dark purple, sweet, good. One of the most popular for canning, because of its sweetness. September.

Italian Prune. Good size, purple, juicy, delicious, fine for drying. September.

Imperial Gage. Large, pale green, juicy, sweet, rich, and

excellent. August.

Satsuma (Blood). Large, globular, with sharp point.

Color, purple and red with blue bloom; flesh firm, juicy, dark red or blood color, fine quality; pit very small. Hardy and vigorous grower. August.

# **BLOOMAID**

## For Flowers - Shrubs - Vegetables

If you want your flowers to bloom earlier and longer, your shrubs and hedges to be greener, thriftier, we recommend that you use Bloomaid. Brings blooms ten days to two weeks earlier—makes plants double the size of those not treated.

Use it in the vegetable garden, around shrubs and to enrich the soil in window boxes and flower pots.

Fifteen times as rich as manure; does not bring in weed seed or the spores of plant diseases.

## 

# V-C FAIRWAY FERTILIZER

## For Lawns and Grass

To have a lawn of closer, faster-growing grass that resists drought, stays greener—constantly thickens and spreads—use V-C Fairway Fertilizer.

This is the treatment now used on the lawns of country estates, polo fields and on the most famous golf courses.

Fifteen times as rich as manure; costs not more than 10 cents for each 100 square feet to be treated. Practically no odor.

#### Prices

## INSTRUCTIONS TO PURCHASERS

How to Figure Your Order. One to four trees or plants of one variety sold at the each rate; 5 to 25 of one variety at the ten rate; 25 to 250 of one variety at the 100 rate; 250 or more at the 1000 rate.

Orders. Orders should be sent in just as soon as possible after receiving catalog. By placing orders early you are more certain of getting the varieties wanted, as late in the season we are usually sold out of some of the varieties.

season we are usually sold out of some of the varieties. If ordered early we can reserve the stock until you want it shipped.

Shipping. We have the Pennsylvania and Reading Railroads and the Lancaster Trolley system, and can ship in any direction with the probability of prompt arrival at destination.

All shipments travel at the cost and risk of the purchaser.

Truck Deliveries. Truck load orders will be delivered free,

reasonable distances; long hauls and smaller orders delivered by special arrangement. We are well equipped to give good

truck service.

We guarantee all stock to be strictly first Guarantee. class and true to name and will upon proper proof refund the purchase price, or replace any stock which proves otherwise. It is understood and agreed that we will not be held responsible for any greater sum than the cost of the stock, should any prove untrue. We strive to avoid mistakes and believe that we are as exact as any in the business.

Our nurseries are inspected every year and every shipment

will be accompanied by a Certificate of the State Examiner.

Replacements. We guarantee all stock we sell to be strictly first class and TRUE TO NAME, dug and packed properly for shipment; we do not charge a price for a tree that, should it die, we could replace it and then still make a profit. often perishes when it is not properly planted and cultivated; also the severe cold and heavy storms of Winter and droughts of Spring and Summer, which are liable to occur, will sometimes cause the best of stock to perish, which is no fault of ours,

It is impossible for us to guarantee trees and plants to live. as this altogether depends on weather conditions and how stock is planted and cared for after planting. The conditions which prevail after stock leaves our hands are such that it is just as impractical for a Nurseryman to guarantee a tree or plant to live as it would be for your best neighbor to sell you a horse or other live stock and guarantee it to live. We can only guarantee to send you good stock up to grade represented, full of life and true to name. Upon request we will furnish

16-page planting booklet with every order.

Terms Cash, except when expressly agreed otherwise.

Substitution. When sold out of a variety of trees or plants. we frankly say so, and when you allow us to substitute we will send a variety similar to the one ordered, as good or better; as we know the many varieties, our substitution, if any, will be of advantage. Late in the season we are sometimes sold out of some varieties of stock; thus when sending your order it is to your advantage to say whether we may substitute or not, that we may get the order off promptly, before the season is too far advanced for successful planting. If you do not wish to exercise this right, please mark your order sheet plainly NO SUBSTITUTION.

Prices. The prices quoted in this catalog are F.O.B. Nurseries, except where otherwise noted.

We do not run a regular agency, but some of our stock is

We do not run a regular agency, but some of our stock is sold to dealers, florists and agents, and we are not responsible for their prices nor for any promises made other than those found in our "Instructions to Purchasers."

#### NEW CUSTOMERS AND OLD

In 1926 we were pleased to do business with 525 customers that had never purchased stock from us before, during 1927—628, and up to the end of the past year, 1928—798. We are glad to announce that this has been accomplished with no apparent loss of our older customers, who are still standing by us. Because of limited space we could print only one of the many fine testimonials we have received.

## J. GORDON FETTERMAN

#### EL RANCHO

MEDIA,

PENNSYLVANIA

Root's Nurseries, R. D. 1, Manheim, Pa.

Dear Sirs:

I wish to take this opportunity of letting you know that the trees I have purchased from you during the last seven years have been universally satisfactory.

They have always been up to or better than the specifications and also, as far as I am able to tell at this time, true to variety.

It has always been a pleasure to do business with you, as I have always found you considerate and obliging.

Formerly I was in the habit of dividing my orders between several Nurseries, as I felt it was good business not to put all my eggs in one basket, but in recent years my confidence has been such that I now give you my entire order.

Very truly yours,

(Signed) J. GORDON FETTERMAN

Plant names used in this catalog conform, for the most part, with "Standardized Plant Names," adopted by The American Joint Committee on Horticultural Nomenclature.

#### MEMORANDA

## ROOT'S NURSERIES, INC.

#### MEMORANDA

## SUCCESSFUL PLANTING AND CARE OF STOCK

#### CARE

The bundles should be opened immediately, the roots dipped in water, then heeled in moist ground so that the mellow earth will come in contact with the roots and thoroughly protect them from the air, having the earth tramped solid about

When ready to plant, take up only a few at a time, puddle the roots and do not allow them to lie exposed to the sun

The ground should be carefully prepared by deep plowing and firming down with a disc and harrow.

#### PLANTING

The holes for planting must be large enough to receive the roots freely, without cramping or bending them from their natural position. All broken or mutilated portions of the roots must be cut off so as to leave the ends smooth and sound. All trees should be planted two or three inches deeper than they stood in the nursery row; pack the soil very firmly about the roots by tamping with the feet or post tamper, being careful not to bark or break the roots. Leave three inches of the surface soil loose to serve as a mulch. If the ground is very dry, apply one to two pails of water before this soil mulch is in place, and after the water has soaked away it can then be placed over the moist soil.

### NUMBER OF TREES OR PLANTS TO THE ACRE

40 feet apart each way	3
30 feet apart each way	3
20 feet apart each way	
18 feet apart each way	j
15 feet apart each way	,
12 feet apart each way	)
10 feet apart each way	;
8 feet apart each way	)
6 feet apart each way	)
5 feet apart each way	;
4 feet apart each way	;
3 feet apart each way 4.840	

Rule—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant, which, divided into the number of square feet in an acre (43,560), will give the number of plants or trees to the acre.

## SUITABLE DISTANCE FOR PLANTING

Apples-30 to 40 feet apart each way. Standard Pears and Cherries—20 feet apart each way. Plums, Peaches and Apricots—16 to 18 feet apart each way. Dwarf Pears and Quinces—10 to 12 feet apart each way. Grapes-rows of 10 to 16 feet apart; 7 to 10 feet in rows. Currants and Gooseberries—4 feet apart.
Raspberries and Blackberries—3 to 4 by 5 to 7 feet.
Strawberries, for field culture—1 by 3 to 3½ feet.
Strawberries, for garden culture—1 to 2 feet apart.
Asparagus, for field culture—18 to 24 inches by 3½ to 4 feet. Asparagus, for garden culture-18 to 24 inches apart each way.
